Re: Oral Ex Parte Presentation in WT Docket No. 05-7

Dear Ms. Dortch:

On behalf of QUALCOMM Incorporated ("QUALCOMM"), this is to report that yesterday, Richard Sulpizio, Larry Hartigan, and I, all of QUALCOMM, and Mark Wallace of Akerman Senterfitt met with Chairman Martin and Sam Feder. During the course of the meeting, we discussed QUALCOMM's Petition for Declaratory Ruling in the above-referenced proceeding,

During the discussion, we provided background information on the MediaFLO service that QUALCOMM, through its MediaFLO USA subsidiary, is launching on its Channel 55 spectrum, and we explained the vague aspects of Section 27.60 (b) (iii) of the Commission's rules—the fact that while the rule allows QUALCOMM to submit an engineering study to justify the proposed separations, the rule does not specify the methodology to calculate interference to affected adjacent channel or co-channel TV/DTV stations; does not establish a level of *de minimis* interference, and does not explain how the Commission would process these engineering studies. To fill in these gaps in the rule, we asked for the relief requested in QUALCOMM's Petition, namely that: (i) QUALCOMM be permitted to use the OET 69 methodology, which is well known to the Commission and the TV industry, to calculate interference; (ii) interference of 2% or less from QUALCOMM's MediaFLO service to adjacent channel or co-channel TV/DTV stations be deemed *de minimis*, the same rule that governs interference from one DTV station to another on the same Channel 55 spectrum; and (iii) the Commission adopt streamlined processing of the engineering studies. Finally, we also stressed the need for an expeditious ruling on the Petition.

Respectfully submitted,

/s/ Dean R. Brenner
